Subject: Re: Libby - Mtg Week Agenda

I would add that EPA/USFS/DEQ/DNRC are be discussing increased collaboration on logging issues in the valley now that risk assessment has been completed. I don't really know what this looks like yet so I don't want to be specific about anything. But I think it would be good that they know that things are poised to move forward.

Please take a look at the attached draft agenda for our updates with the Congressional staff and Commissioners the week of the 6th.

Mike – I couldn't think of anything to add to the construction piece, unless you wanted to mention the construction manager's meeting in Denver last week. I will add CFAC to the agenda for the Congressional staff (do you think the Commissioners would be interested?) and offer to provide short updates on other potential EPA activities in Montana.

Christina – Of course a lot is going on at OU3, but I hesitate to share too much of work in progress at the Commissioner's meeting. Anything you want to add – maybe a brief mention of the OU3 boundary determination issue?

Dania – I think the redevelopment ideas are best left off the Commissioner's agenda for now. We'll keep that to Tina, Nick and Mark until we have a firmer path forward.

I'll be checking email periodically while on Spring Break, so let me know if you need me for anything next week. If I don't talk to you before then – see you all on the 6th!
